

# Cross for Journey with Christ name tags

This is to explain how to use the 2 word files to create name tags for the Cats and the first time workers.

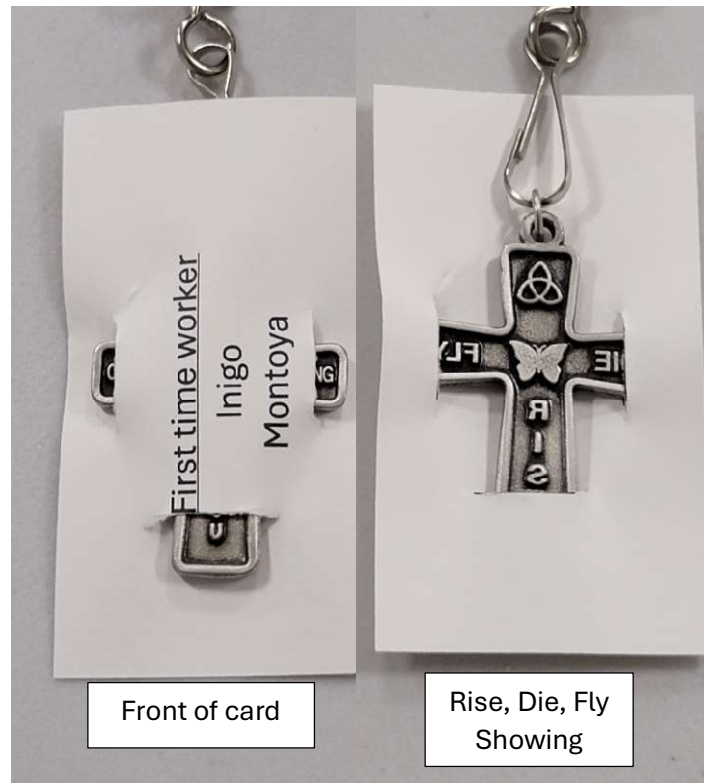

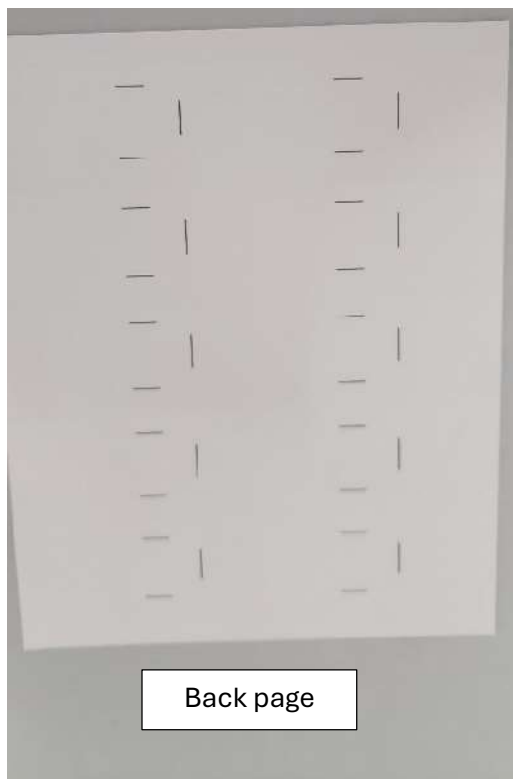

First you will need sheets of blank plain business cards that are 10 cards to a page.

The document “**back of cross card.docx**” needs to be printed on one side. This creates the lines to help in cutting slots for the cross.

The front (“**Front of FTW cross card.docx**”) document is setup to place the first and last name centered on the card. You can mail merge the list of who needs crosses if you prefer.

Once you have printed on both sides of the card you can cut the slits using the lines as a guide. You will probably need to make the slits a little longer to fit the cross through. It is easier to place the Lanyard on the cross first.

The placement of the cross in the card the show “Rise, Die, Fly facing outward. See the picture below on how it will look once the cross is on the card.

Rise, Die, Fly
